

NEW FLUVAL 

BIO-STRATUM

Providing the same powerful mix of nutrients and minerals as original Stratum for explosive plant growth, Fluval's All-New Bio-Stratum is infused with BENEFICIAL "BIOACTIVE" BACTERIA that will break down waste, kickstart the nitrogen cycle and rapidly reduce ammonia levels to help stabilize water conditions in new aquariums and keep the established aquariums healthy. Acting as an additional source of biological filtration, Bio-Stratum's smaller powder format granules are porous and non-compacting, which further promote bacterial colonization and enhanced water quality.

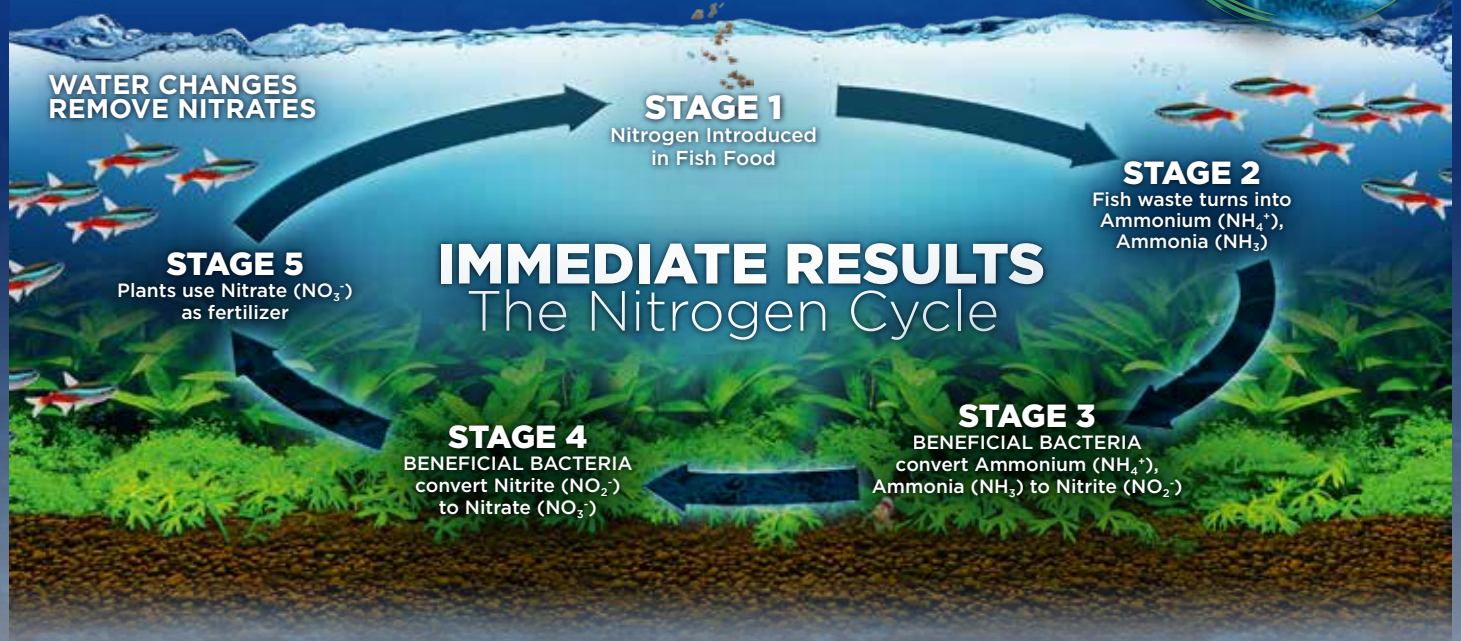

VOLCANIC SOIL FOR PLANTED AQUARIUMS - POWDER FORMAT

ENHANCED BIOLOGICAL ACTIVITY

- Infused with dormant BIOACTIVE BENEFICIAL BACTERIA that once in contact with water, are activated to break down waste and kickstart the nitrogen cycle
- Rapidly reduces ammonia levels to help stabilize water conditions in new aquariums
- Acting as an additional source of filtration, Bio-Stratum's porous structure promotes bacterial colonization for improved water quality

WITH
BIOACTIVE
BENEFICIAL BACTERIA

IDEAL FOR FINE & DELICATE ROOT SYSTEMS

- At only 1-3 mm in diameter, Bio-Stratum's lightweight powder granules are non-compacting, allowing the finest and more delicate roots to easily penetrate and spread throughout the porous substrate
- Ideal for use in smaller freshwater aquariums or as a top layer in larger tanks
- Unique curing and heat treatment process helps extend soil life and ensures no parasites are present

COLLECTED FROM THE MINERAL RICH FOOTHILLS OF THE FAMOUS MOUNT ASO IN JAPAN

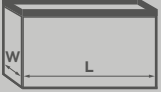

STIMULATES STRONG PLANT GROWTH

- Contains a powerful mix of nutrients, minerals and trace elements exclusively available to plants
- Promotes healthy plant development, vigorous growth and vibrant colors
- Supports a neutral to slightly acidic pH - ideal for live plants as well as fish and shrimp
