

# FULLY ELECTRONIC AQUARIUM HEATER

T Series submersible heaters combine electronic accuracy, reliable monitoring, and multiple safety features to easily maintain desired aquarium water temperatures. The 360° indicator light ring displays heat mode clearly from any angle, while a convenient large grip dial allows users to adjust the water temperature with ease. An integrated shut-off feature automatically cuts power in the absence of water to prevent overheating, while a rubber tipped heater guard provides additional peace-of-mind protection.

## DIGITAL ACCURACY & RELIABILITY

### Industry Leading Technology

- Advanced electronic sensor accurately maintains desired water temperature
- 24/7 monitoring regulates temperature and avoids large, unsafe fluctuations

## 360° HEAT INDICATOR

Full wrap-around light ring indicates current heat mode clearly from any angle

- **RED** illumination indicates when heating function is engaged
- **BLUE** illumination indicates when heater function is in standby mode

## ADDED PROTECTION AND SECURITY

### SAFETY SHUT-OFF

In absence of water, power is automatically cut to prevent overheating.

### HEATER GUARD

Provides additional protection against accidental breakage.

## EXCEPTIONAL CONVENIENCE

### LARGE GRIP DIAL

Easily adjusts water temperature from **22-32°C**.

### VERSATILE POSITIONING

Fully submersible design with secure suction mount allows for placement anywhere in the aquarium, either vertically or horizontally.
