

# AIR PUMPS

A Series Air Pumps are created to significantly improve water circulation and essential oxygen levels for fish, plants, corals and beneficial bacteria. Hobbyists will appreciate a powerful air delivery that is designed with ultra-quiet operation and energy-efficiency in mind, in addition to adjustable flow control dials that allow each outlet to be independently controlled.

## ADJUSTABLE FLOW CONTROL

- Control dials allow each outlet to be independently controlled
- Permits a precise, regulated airflow
- Single and double outlet models available

SINGLE  
OUTLET  
(A851)

DOUBLE  
OUTLET  
(A853 & A854)

## ULTRA-QUIET OPERATION

- Engineered noise dampening baffle chamber
- Oversized rubber feet stabilizers help prevent vibration and noise
- Oversized rubber feet create outstanding stability

BAFFLE  
CHAMBER

RUBBER FEET

## POWERFUL AIR DELIVERY

- Excellent output flow to pressure ratio
- For usage with 1 or several air stones
- Improves water circulation and oxygen levels for fish, plants, corals and beneficial bacteria

## ENERGY EFFICIENT

- Draws as little energy as 2W to 4W
- Inexpensive to operate

## FLEXIBLE INSTALLATION

- Space-saving rubber hang tag
- In addition to horizontal positioning, pump is easily mountable to side wall of aquarium stand for less clutter

**MAXIMIZE PERFORMANCE  
WITH MUST-HAVE  
ACCESSORIES**
